

NAVVC Institute: Earn Hands-On CE in May

Kick off your summer of CE at the NAVVC Institute, a 5-day immersive training event for veterinarians that will help you gain advanced techniques through hands-on instruction in 1 specific topic. Taught by industry leaders, you will have the chance to perfect both everyday and specialized skills that will greatly benefit the lives of your patients and longevity of your career.

The NAVVC Institute is an all-inclusive event scheduled for May 23-28, 2021, in Orlando, Florida. Registration

earns you 5-day access to intimate class sizes where you'll receive plenty of 1-on-1 instruction from world-class leaders, as well as lodging, meals, course notes, 32 CE credit hours, a discounted registration to VMX 2022, a free individual annual subscription to VetFolio, and more.

The event offers a topic of study for everyone, from dentistry, emergency medicine, and ultrasound to exotic medicine, applied behavioral medicine, and ABVP exam prep. You'll be sure to recognize the respected names in veterinary medicine as your instructors and receive generous knowledge and expertise that will carry over between differing fields, cases, and jobs.

This event limits class sizes to 32, and current health guidelines will be strictly followed. Attendees have previously called Institute "the best-kept secret in continuing education" and said "the small size of the course made it intimate, and I learned more from this course than I have from any other previously attended."

The NAVVC Institute will help you become an expert in your clinic, empower you to keep patients in-house for specialist visits rather than issuing referrals, and increase your revenue potential. Don't hesitate to register, as some classes are already filling up. Visit navc.com/institute to register, view the offered courses, and browse the program guide. **TVP**
