

Treating the itch

is just scratching
the surface

Sporimune™ (cyclosporine capsules) USP MODIFIED

Feature #1

The first generic USP modified cyclosporine approved for dogs.

Its Benefit:

Unlike many human generic cyclosporine products, Sporimune™ has been tested and approved for use in dogs. It's also USP modified which enhances absorption.

Feature #2

Bioequivalent to the pioneer product.

Its Benefit:

You can expect the same safety and efficacy with Sporimune™.

Feature #3

Cyclosporine targets multiple components of atopic dermatitis.

Its Benefit:

Treats more than just the itch.

Feature #4

Affordable.

Its Benefit:

Allows you to provide affordable options to treat atopic dermatitis.

IMPORTANT SAFETY INFORMATION: As with all drugs, side effects may occur. Do not use Sporimune™ in dogs with a history of neoplasia, reproducing dogs, or dogs with a hypersensitivity to cyclosporine. Sporimune is a systemic immunosuppressant that may increase the susceptibility to infection and the development of neoplasia. For use only in dogs. Keep this and all drugs out of reach of children. Capsules should not be broken or opened. Wear gloves during administration and wash hands after. Gastrointestinal problems and gingival hyperplasia may occur at the initial recommended dose. Safety and effectiveness have not been established in dogs less than 6 months or 4 lbs. Use with caution in dogs with diabetes mellitus or renal insufficiency, and with drugs that affect the P-450 enzyme system. Killed vaccines are recommended. The most common adverse events are vomiting and diarrhea. Refer to the product insert for full prescribing information or visit www.dechra-us.com.

CHECK-OFF &
ECHO NOTES

State the Issue

Ms. Jones, my exam revealed that Spot's atopic dermatitis hasn't improved as much as I would like. The medication I prescribed previously treated Spot's itchiness, but not other components of the disease.

State the Solution

Sporimune™ (cyclosporine capsules) USP MODIFIED is different; it targets multiple components of atopic dermatitis.

Make Your Recommendation

Atopic dermatitis is an inflammatory disease and it requires life-long care and maintenance. Due to the complexity of the disease, a single medication may not control the disease in every dog. So for Spot, I want to prescribe Sporimune™ to manage his itch and provide additional relief.
