

VMX 2025: Festival of the HeARTS

It takes a lot more than medical knowledge to work in veterinary medicine day in and day out—mostly, it takes heart!

At VMX 2025, we'll get to the heart of the matter and celebrate the emotion, the art, and the whole person behind the science. You'll learn, be inspired, and express yourself through all types of art forms and return to your clinic with a renewed sense of passion and purpose.

The educational program will cover the latest medical advancements and best practices, delivered with the quality for which VMX is known. VMX Virtual will include its own program of 200-plus hours of CE, including over 100 sessions streamed live from VMX in Orlando, Florida. In-person sessions will consist of over 950 hours of CE available, comprising:

- **Small animal tracks** including dentistry, surgery, sports medicine, acupuncture, dermatology, and critical care
- **Exotic animal tracks** consisting of aquatic, avian, reptile, and other exotic companion animal medicine
- **Large animal tracks** covering equine imaging, inflammation, and farm animal care
- **Educational tracks** for veterinary nursing/technology, practice management, and personal development
- **All-new content** including educational sessions in Spanish, a honeybee symposium, and a customer service representative program

Program electives are also back, including Hands-on Workshops, Masterclasses, Meet the Professor Luncheons, and Behind-the-Scenes Tours at SeaWorld Orlando and Homosassa Springs State Wildlife Park. Additional fees apply.

During downtime between sessions, a visit to the Expo Hall will provide insight into innovative, next-level products, services, and equipment that can be integrated in your practice.

So mark your calendar for VMX 2025, taking place January 25-29, and join us for the most heartfelt event yet. For more information, visit navc.com/vmx. **TVP**
