

Unique phosphate binder for cats.

Key Feature #1:

Catney® One Contains Lathanum Carbonate.

Its Benefit:

Many kidney support supplements contain calcium. Some cats needing a kidney support supplement may need to avoid additional calcium.¹

Key Feature #2:

Catney® One has been shown to have excellent in-vitro phosphate binding capacity.²

Its Benefit:

Data supports this product as a great phosphate binder.

Key Feature #3:

Catney® One is sold in a package of 30 single day dosage packets.

Its Benefit:

Premeasured packets make it easy to administer.

FREQUENTLY ASKED QUESTIONS

Q Is the time of day important when giving Catney® One?

A Catney® One can be given to the cat at any time of the day during meal time. However, ensure that other oral products or oral medications are given 1 hour before or three hours after Catney® One.¹ The simultaneous administration of Catney® One and Porus® One is feasible without any concerns.²

Q How long does Catney® One remain effective if it has already been opened?

A Once a packet is opened, store in a cool dry place and use within 24 hours.³

Q When should I suggest my feline patients use Catney® One?

A Phosphate binders are recommended when phosphate concentrations remain elevated even after initiation of a phosphate-restricted diet.¹

Q What does the NASC Seal mean?

A The NASC Quality Seal identifies products from companies that are committed to quality, vigilance, and continuous improvement to promote the well-being of companion animals and horses.

ECHO NOTES

State the Issue

Ms. Brown, it looks like your cat Jack's phosphorus levels are still elevated even after transitioning to a kidney support diet.

State the Solution

Catney One is a supplement that supports kidney health in cats by reducing phosphate absorption. I believe Catney One will help support Jack's kidney health.

Make Your Recommendation

Ms. Brown, I believe Catney One will be an important tool to help support Jack's kidney health. Do you have any questions?
