

Innovation Made Accessible

Safe, reliable and affordable generics are within reach with our ever-expanding portfolio of pharmaceuticals.

ZyVet Animal Health produces the quality generics you need at a price you and your clients can afford. It's why ZyVet is committed to the highest quality and consistency possible, producing our products in our own animal health facilities which meet all U.S. regulations and guidelines. Because when veterinarians have access to better solutions, animals everywhere can live healthier, happier lives.

Meet the needs of your clinic and clients with our growing portfolio.

CHECK-OFF &
ECHO NOTES

State the Issue

Be ready to talk to your clients about generic alternatives to brand-name pharmaceuticals.

Are you open to using generics?

If **yes**, proceed as necessary.

If **no**, explain why you are confident in bioequivalent products and the cost savings they provide.

Bioequivalent

All generic pharmaceuticals sold in the United States are FDA-approved. To gain FDA approval, the generic manufacturer must prove their product is "bioequivalent" to the brand. Therefore, it contains the same active ingredients, is identical in strength, dosage form, and administration route.

Quality

ZyVet Animal Health products are manufactured in a state-of-the-art facility that meets all U.S. standards and good manufacturing practice regulations required by the FDA for branded products.

Accessibility

Generic pharmaceuticals allow more clinics and pet parents to access certain medications because generics typically cost significantly less than their branded counterparts.

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.
